A; Title: Isolation and identification of C-type natriuretic peptide in chicken brain. A; Reference number: JT0581; MUID:91113186
A; Accession: JT0581
A; Molecule type: protein
A; Residues: 1-22 <ARI>A; Rosession: JT0581; MUID:9110186
A; Residues: 1-22 <ARI>A; Residues: 1-23 <ARI>A; Residues: 1-23 <ARI>A; Residues: diuretic; hormone; natriuretic; osmoregulation

Biochem. Physiol. 95B:773-779(1990).

FUNCTION: LYSOZYMES HAVE PRIMARILY BACTERIOLYTIC FUNCTION; THOSE IN TISSUES AND BODY FLUIDS ARE ASSOCIATED WITH THE MONOCYTE-MACROPHAGE SYSTEM AND ENHANCE THE ACTIVITY OF IMMUNOAGENTS.

CATALYTIC ACTIVITY: HYDROLYSIS OF THE 1,4-BETA-LINKAGES BETWEEN N-ACETYL-D-GLUCOSAMINE ANDLYSIS OF THE 1,4-BETA-LINKAGES BETWEEN N-ACETYL-D-GLUCOSAMINE ANDLYSIS OF THE MALDEN ACETYL-D-GLUCOSAMINE ANDLYSIS OF THE STORY HYDROLYSIS OF THE
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              MISCELLANEOUS: LYSOZYME C IS CAPABLE OF BOTH HYDROLYSIS AND TRANSGLYCOSYLATION; IT SHOWS ALSO A SLIGHT ESTERASE ACTIVITY. ACTS RAPIDLY ON BOTH PEPTIDE-SUBSTITUTED AND UNSUBSTITUTED PEPTIDOGLYCAN 6, SLOWLY, ON CHITIN OLIGOSACCHARIDES.

SIMILARITY: BELONGS TO FAMILY 22 OF GLYCOSYL HYDROLASES.
                         (ALPHA, BETA, & GAMMA), LINKED TO EACH OTHER BY DISULFIDE BONDS. MISCELLANEOUS: CONVERSION OF FIBRINGE TO FIBRIN IS TRIGGERED E THROWBIN, WHICH CLEAVES FIBRINOPEPTIDES A AND B FROM ALPHA & BET CHAINS, AND THUS EXPOSES THE N-TERMINAL POLYMERIZATION SITES
                                                                                                                                                             AGGREGATION.

11 FUNCTION: CONVERTS ANGIOTENSIN I TO ANGIOTENSIN II BY RELEASE OF THE TERMINAL HIS-LED, THIS RESULTS IN AN INCREASE OF THE VASOCONSTRICTOR ACTIVITY OF ANGIOTENSIN.
11 CAPALYTIC ACTIVITY: RELEASE OF A C-TERMINAL DIPEPTIDE, OLIGOPEPTIDE-|-XAA-XBB, WHEN XAA IS NOT PRO, AND XBB IS NEITHER ASP NOR GLU. CONVERTS ANGIOTENSIN I TO ANGIOTENSIN II.
12 COFACTOR: BINDS TWO ZINC IONS (BY SIMILARITY).
13 SIMILARITY: BELONGS TO PEPTIDASE FAMILY M2 (ZINC METALLOPROTEASE).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   MEDILINE-87128067; PubMed-3028395;
